SEO / GEO / AEO Audit Report

FULL AUDIT · 2026-07-19

Executive Summary

Sanford has the strongest AI-search foundation in the portfolio: rich local entity schema, FAQPage coverage, HowTo markup, Speakable targets, and a detailed llms.txt. The main risk is factual inconsistency: the site gives conflicting pricing floors (\$80 versus \$140–\$350+) and conflicting experience claims (10+ years versus 2 years under the current company). Local identity is incomplete because no street address is published, and four guide pages are thin and carry only breadcrumb schema.

Dimension	Score	Status
SEO	7/10	On Track
GEO	8/10	Strong
AEO	8/10	Strong

Crawl Scope

37 pages: homepage, About, FAQ, Guides index, 11 service pages, booking/custom quote/careers, and 15 guide articles; robots.txt, sitemap.xml, and llms.txt also inspected.

SEO	Thin content	Four comparison/deals guides contain only about 343–400 words and BreadcrumbList schema.	Needs Attention
GEO	AI discoverability	llms.txt provides brand facts, pricing, CTAs and entities; three guides expose Speakable targets.	Good
GEO	E-E-A-T	Topaz West LLC is named, but authors are generic and no named team biographies or review evidence were found.	Needs Attention
GEO	Entity consistency	10+ years, 2 years, and 5–7 years appear across pages, weakening machine trust.	Critical
AEO	Structured answers	FAQPage appears on roughly 27 pages; HowTo exists on Airbnb, move-out and booking content.	Good
AEO	Voice/local	Phone, email, hours and service areas are present, but streetAddress is absent.	Needs Attention
